EDUCATION

 Bachelor's degree in Mathematics
(expected in July 2024)

 Scientific High School Diploma
2020, 100/100

CERTIFICATIONS

 Cambridge (B1)

LUIGI EMANUELE ZIPPO

MATH STUDENT

ABOUT ME

Dedicated **Mathematics** student with a profound interest in **Data Science**, expected to graduate in July 2024. With a strong foundation in mathematical concepts, constantly seeking opportunities to apply analytical skills in real-world scenarios.

FORMATION

High school and ASL

Liceo L. Garofano, 2015 - 2020

During my scientific high school education, especially through ASL, I gained **hands-on experience** in conducting experiments, developing skills in **data collection, analysis, and interpretation**.

Course of Study in Mathematics

University of Naples "Federico II", October 2020 - July 2024

My Bachelor's degree in Mathematics has refined the analytical skills I started developing in high school. University education introduced advanced techniques for analyzing **complex problems**.

Apple Foundation Program and Apple Developer Academy

University of Naples "Federico II", respectively February 2023 and September 2023 - July 2024

The Foundation Program and the Academy have been fundamental in the development of my **soft skills**: I tried to work with as many as possible **different** people, in order to exit my **comfort zone** and learn new things, **independently**. I improved my **coding, design** and **communication skills**, participating in the projects I was most **passionate** about.

Accenture workshops

Accenture, 26/03/24 and 23/04/24

Thanks to the Academy I had the chance to attend the **"Effective presentation"** and **"Leadership"** Accenture workshops, refining what we learn in the Academy, from another point of view.
